Potato grouper

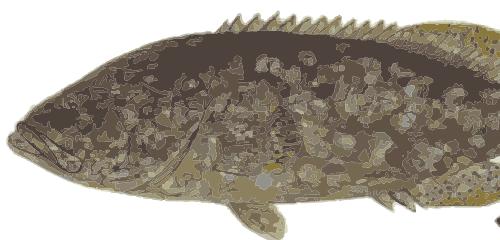

*Epinephelus tukula*

**Aya zerar**

Humphead wrasse

*Cheilinus undulatus*

**Vyey krab**

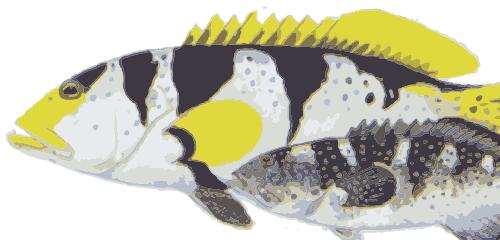

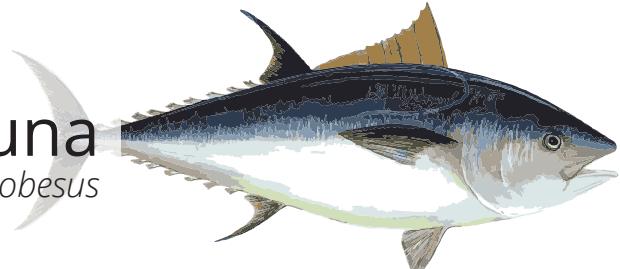

Giant grouper

*Epinephelus lanceolatus*

**Bigeye tuna**

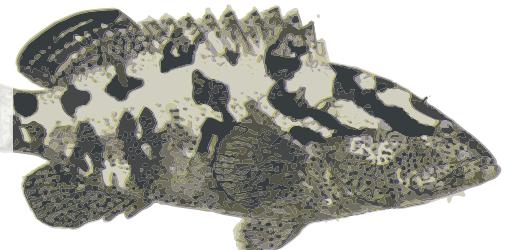

*Thunnus obesus*

**Babonn sesil**

Blacksaddled grouper

*Plectropomus laevis*

**Vyey masata**

Camouflage grouper

*Epinephelus polyphekadion*

**Babonn zannannan**

Roving coralgrouper

*Plectropomus pessuliferus*

**Release as quick as possible**

**Do not touch the eyes or gills**

If possible, remove the hook in  
the water

If the hook is too deep, and  
survival is likely, just cut the line

**Do not fish deeper than 50 m**

Use pliers—it's usually faster

Be aware of predators: if there  
are sharks around, it might be  
better to release the fish  
somewhere else
